

OIL VANISHER

Ultimate Stain Remover™

8805-005, 8805-055

Description

- Microbe-powered oil stain remover.
- An organic-based cleaner and degreasing agent designed to break up and remove oil stains from a variety of surfaces.
- Oil-consuming microbes break down and digest oil from a variety of surfaces.
- Quickly removes old and embedded stains regardless of age.
- Easy to use on any water-safe surface including concrete, asphalt, brick, paving tiles and cement.
- Utilized in many household, commercial and industrial applications.
- Bio-based, all-natural and biodegradable.

Advantages

Removes oil stains from concrete and asphalt driveways, garages and parking areas. Most cleaners just spread the stain out while others eat away at the surface. Oil Vanisher™ is a liquid that will soak into the surface and lift the oil out to a water suspension where it can be washed away. When applied to a stained surface, Oil Vansisher™ breaks up hydrocarbons. It lifts stains from surfaces rather than dissolving or burning them the way acid-based cleaners and other solvents do.

Technical Information

Usage	Dilution Ratio	RTU - 1:5
Physical Properties	Appearance	Liquid
	Color	Clear
	Fragrance	None
	pH	7
	Shelf Life	Minimum 1 Year
Primary	8805-005	5 gal.
Packaging	8805-055	55 gal.

Technology

BioTec Technology is the science of using both microbes **and** enzymes to dispose of oil and grease, safely and rapidly. BioTec Technology consists of microbes and enzymes producing complex chemical reactions that metabolize oil and grease into carbon dioxide and water. Enzymes work by breaking apart large complex compounds like oil and grease into smaller molecules. The microbes then can readily digest these smaller molecules releasing them as carbon dioxide and water. The microbes and enzymes are completely safe because they are non-pathogenic, naturally-occurring and salmonella-free. These microbes are chosen for their ability to degrade hydrocarbons such as oil, grease, transmission fluid and gasoline.

Applications

General Cleaning: Clean excess soil from surface. Apply product on affected areas. Scrub affected areas with brush. Wait a few minutes and rinse with water.

Auto Floor Scrubber: Do not add product directly to the auto floor scrubber. Pre-spray the product on to the affected areas. Add water or cleaner to auto floor scrubber and double-scrub. Allow the product to remain on the surface for a few minutes; then, remove solution by vacuuming.
